

Win the Lottery - Every drawing!!

Hello, my name is Scott Lamon and I am about to show you a simple yet ingenious system that can guarantee you win the lottery.

As crazy as that sounds, I'm going to lay out a step-by-step process that will show you - *Beyond any shadow of a doubt* - how you can begin winning as early as the next Mega-Millions drawing.

Now, I will say that as of right now you cannot legally participate if you are a resident of Nevada or Utah (because of their gambling laws)...

Although if you do live in one of those states you may very well decide to either move to another state or team-up with a friend or family member in a different state once you see this. ;-)

I will also tell you - Right Up Front - this is NOT a Get-Rich Quick business!! Although it does involve the Lottery (and Yes lightning can strike) it is not likely that you will win a Massive Jackpot on Day 1...

With that being said, I'll let you know that as far as business opportunities go I never jump into anything half-cocked and I hope you don't either. I truly want you to read over this entire opportunity before you decide if it is right for you... it might not be!!

Some people, for instance, because of religious beliefs simply do not want to have anything to do with Gambling of any sort... including the Lotto and I respect that. Everyone is entitled to their beliefs and I, for one,

would never ask anyone to go against their beliefs or gut feelings!!

Now, some people are looking for the next-big-thing and jump from one business to the next hoping to get rich... I am NOT one of those people.

In fact, anyone who knows me is aware that I fully investigate any business opportunity before I ever become involved. I look at everything from a business standpoint. I analyze the market, potential customer base, advertising and all competition in any given industry from a Cost per Action view...

What that means is simply that - before I invest any sum of money I will know (almost to the penny) how much any advertising dollars I spend will return to me in revenue.

You could say I'm pretty anal about that but it's just good business sense in my book.

That is one of the reasons why, if **IDO** get involved in any business, there are several people who know me that come on-board if I call them... (No questions asked).

They know if I'm willing to invest my time and money promoting something then it is because I have already run the numbers and I know I will profit from it.

Since you probably don't know me yet, I do not expect you to join my team so easily. Instead, I'll show you in *black and white* what you can expect here. I do not believe in hype nor will I ever try to twist anyone's arm. If you see it GREAT! If not, no hard feelings!! Fair enough?

First, I will tell you a little bit more about myself and why you may want to read every word of this document.

As I said before, my name is Scott Lamon and I am the proud owner and webmaster of several online web sites including ScottLamon.com and of course NewLotterySoftware.com where you likely found this report.

I am an Internet Marketer and Affiliate Marketer that has experienced a lot of success online over the last few years. In fact, because I feel I have been so fortunate, I offer an online Mentoring program that helps people make money on the internet - Free of Charge.

Even though I have personally helped and worked with folks who have gone on to earn Millions of dollars, I have never seen a system with the income potential I'm going to show you now.

As a way of giving you a little more background information I'll tell you that I am really just a small-town country boy at heart. I was born and raised in East Texas and now live in the town of Tyler, TX.

Even though I've experienced tremendous success you would never know it just by meeting me. I'm not sure exactly what my neighbors think I do for a living. They know I'm at home a lot and see me in shorts and T-shirts working in the yard or walking my dogs but probably aren't aware of the real money that I'm making from my home-office.

I lead a pretty simple life, live in a modest home and drive an older model Nissan truck. The main difference between me and my neighbors is that **I don't owe the bank a penny for a mortgage, car loan or anything of that nature...**

I pay cash for virtually everything I do and I like it that way!

While I feel relatively young at the age of 40, I do have one son who has just finished up his 3rd year of college (as of May 2009).

If we were to meet or talk by phone you would find that I speak with a "Texas Twang" but please don't discount my teachings as that of a back-woods country bumpkin... I own and use some of the most advanced, high-end & expensive computer technologies available today!

But, fortunately for you, I do not expect you to buy all of the hardware and software that I use. *You don't need to do that.*

In fact, most of the programs you are about to receive are completely free and readily available online. Heck, you may be using some of them right now and simply not understand their full potential!

I am going to make this process very simple and straight forward.

Although there are some Statistics you should be aware of:

Even though the step-by-step instructions that follow can easily be completed **in less than an hour** -

- At least 50% of those viewing this document **WILL NOT** finish it!
- Of the remaining readers, another 30-40% will try to 2nd guess it
- *Sadly, only about 10-20% will actually take the steps needed to change their financial future.*

Don't ask me why. Some people are just content with being broke and miserable the rest of their lives. For some reason this is doubly true for

Americans. Even though we live in the greatest country in the world, it is often **only new immigrants or the newest citizens** that actually prosper. Perhaps, they are simply willing to work harder to live their dreams.

I don't say that as an insult to Americans. I love being an American!! I'm just stating a simple fact!

In my opinion, U.S. citizens have been somewhat brain-washed into living a life of mediocre servitude.

We are taught that we need to get a "*REAL JOB*", work 40-80+ hours a week making someone else rich and that's just the way life is!! We're criticized as being a *dreamer* if we even think of stepping out of the box.

In this *real job* we are expected to appear happy (even though most are completely miserable). Pay at least 1/3 of our income towards taxes, and take advantage of numerous credit cards & 12-month no interest deals and other similar means to buy things we really don't need.

A great example of this is the idea that we need to buy that BIG HDTV flat screen TV just so we can watch, in vivid detail, all the commercials and infomercials designed to sell us more meaningless junk!

Of course, because most people **ARE** so miserable with their *Wonderful Jobs* it becomes a vicious cycle.... We buy more stuff in an attempt to be happy. And we become chained to that job to pay for all the new stuff!!

Call me a rebel, a lunatic or whatever you want but that is simply not my idea of a life worth living...

We are all given a limited amount of time on this Earth and I do not believe we should waste even a minute of it being unhappy, resentful, restless or broke for that matter!!

While I am a firm believer in the statement "Money cannot buy your happiness", I do know that you can accomplish a **lot of good in the world** if you have the means to do so and a caring heart.

Ok, it's just about time for me to get off-of-my-soapbox but please, PLEASE understand (if nothing else) that you **CAN** make a very good living working for yourself if you truly have the desire and determination to do so.

I would never expect anyone to quit their *day jobs* without a back-up plan and additional income streams already coming in... but for God's sake - Get off the treadmill, out of the rat-race and do something meaningful with your life while you still can... whether it's this opportunity or something else does not matter... just do something!!

And if you do start making a good deal of money... don't waste it!
There are sooooo many great causes out there. You could truly help make a BIG difference in the world!! Alright, stepping off the soapbox ;-)

As far as the legal stuff is concerned:

You may read and/or share this document with anyone you like but you may not make any changes, sell this document or copy and redistribute it in any way except in it's original form.

On to the Good Stuff!!!

First, I am going to give you a small taste of what I am talking about with this particular opportunity. You will see that not only is it possible to win the lottery consistently with this program but very likely you'll share in many winning tickets each week. [Click here to view the winning tickets from just 1 week](#)

You'll notice that most of the winning tickets were small...either just \$1, \$2, \$3 or \$7 with a couple of \$ \$8, \$9, and \$10 & **a single \$158 winner**. But the thing to keep in mind here is that this is still very new and growing daily.

What you really need to understand at this point is just how big the earnings potential is with this system. You can view the exact statistical forecasts on the same page that you downloaded this document - [Here](#)

These statistics are based on having a LARGE lottery pool of 80,000 members.

Your income would be in excess of \$1 Million per year!!

While that might sound impossible to achieve, you are going to see that it is very easily accomplished if you *follow the tutorial below*.

Alright, what follows is a step-by-step tutorial on how to start and run your own online *lottery business* virtually from scratch. You'll be introduced to several tools and techniques that will make your job much easier than you might think. It is simply a matter of learning to use those tools effectively.

I will start by saying that I do not charge anything for this course. Also 95% of the tools that you will be using are completely **FREE** and easily obtained online.

However, there are a few items that you must pay for yourself. I will show you exactly where to get the best deals on these and I'll explain how the price for them is miniscule compared to the rewards of having them.

These items mainly consist of your own DOMAIN NAME - (which is your web site address - like ScottLamon.com), you will also need a web host (that is the place your web site will reside). Domain names generally run \$8 for an entire year and your web hosting will only run you about \$6-8 per month.

Other than the items listed above there is really only a few more things that will actually cost you anything! These are a few pieces of software (like the online lottery pool software) that make your job infinitely easier to run. I'll go into more detail later about these tools but just be assured that your entire cost to create your own business will be **less than \$100 TOTAL**.

With the tools I will give you, you will be able to earn a minimum of \$500 - \$1000 per month within the next 6 months if you will simply follow the steps as outlined. This is based on you only working part-time (*a few hours per day at most*).

If you are able to invest more time then the results will be substantially better and you can earn a lot more in a shorter period of time. While I don't want to scare you off with larger figures, it is not unheard of to build a \$5000 - \$10,000 per month income within 6 months to a year if you are willing to put forth the effort.

The only thing I cannot give you is the desire and determination to take action. ***That must come from within you!***

So the only question that remains:

Are you willing to take the advice that I give you and put it to work? The words in this document are not going to make you rich by themselves. It is only through **ACTION On Your Part** that financial change will come.

I am willing to teach you all that I know and will even make myself available to speak with you one-on-one by phone if needed.

All I ask is that you follow the steps as explained and do your best to learn the material BEFORE contacting me by phone.

While I don't mind clarifying a particular point, I sometimes get dozens of calls per day and I do not enjoy explaining something on the phone that has already been explained in these lessons. I do not say that to be rude, it's just I would never

attempt to waste your time and I certainly don't like wasting my time. Like I said before, we only have so much time to begin with =)

And frankly, I feel if someone is not willing to make the effort to follow an easy-to-follow tutorial.... they probably shouldn't be attempting to go into business for themselves anyway. (Just another Quick Soapbox moment) LOL

So, if you have questions at any time, write them down BUT proceed further into the lessons to see if those questions are already answered at a later point ;-)

So if you are ready to get started and determined to take the actions required

STARTING RIGHT NOW TO CHANGE YOUR LIFE FOR THE BETTER...

Then let us begin with the *Tools of the Trade* on the next page...

Tools of the Trade

The first thing that you are going to need is a few free tools that you can download right now. These are the same tools that you will be using to simplify your life while working online.

You do not need to be completely familiar with each tool just yet, you simply need to put them in your arsenal so that they will be available to you when you need them.

I will explain what each one does in a later lesson as you begin using them. That way you will learn from hands-on experience.

The first thing that you need to download (if you don't have it already) is a browser called FireFox. Even if you do currently use this browser I am going to show you several add-ons that are available to change the way you use it.

You can download the most current version of [FireFox by clicking here](#)

It is available for both PC and Mac users.

Once downloaded and installed you should select this as your default browser. Firefox will prompt you the first time you open it to do so.

Take a moment and familiarize yourself with this particular browser. It will be a key element in your bag of tools. It may look basic at this point but with the add-ons we are getting ready to install, it will drastically reduce the time and effort you will need to put forth!

On to the Add-Ons

The next step is to enhance your new Firefox browser with the use of add-ons.

Because Firefox is what is called an *open-source program*, people from all over the world are able to create tools for it that you can add to change the way the browser functions.

There are literally thousands of these add-on programs available but we are only going to focus on the ones that have been proven to work.

I will now walk you through the steps you'll need to take to install each new feature.

Click on each link on the next page. They will take you directly to a web page that allows you to "Add to Firefox". (Sample screenshot of one of the Add-Ons below)

The screenshot displays the Firefox Add-ons interface. At the top left is the Firefox logo, followed by the heading "Firefox Add-ons" and the text "Add-ons extend Firefox, letting you personalize your browsing experience. Take a look around and make Firefox your own." Below this is a green button labeled "Categories" and a search bar with the placeholder text "search for add-ons" and a dropdown menu set to "within all add-on".

The main content area features a preview of the "SearchStatus 1.30" add-on by Craig Raw. On the left, a browser window shows the add-on's menu with options like "About...", "Options...", "Enable", "Highlight Nofollow Links", "Link Report...", "Meta Tags...", "Show in Archive.org", "Show Whois", "Show robots.txt", "Show Keyword Density...", "Highlight Keyword...", "Show Indexed Pages", and "Show Backward Links". Below the preview are five stars, "57 reviews", a "Share this" button, and download statistics: "7,420 weekly downloads" and "521,573 total downloads".

To the right of the preview, the add-on title "SearchStatus 1.30" is displayed with the author "by Craig Raw". Underneath, it is categorized as "Search Tools" and described as: "Display the Google PageRank, Alexa rank, Compete ranking and SEOMoz Linkscape mozRank anywhere in your browser, along with fast keyword density analyser, keyword/nofollow highlighting, backward/related links, Alexa info and more." It is noted as "Updated May 18, 2009". A prominent green button labeled "Add to Firefox" is visible, along with a link to "This add-on has a privacy policy."

MAKE SURE FIREFOX IS SELECTED AS YOUR DEFAULT BROWSER

You will be prompted after adding each program to restart Firefox...

You do not need to restart each time and instead can install all of the following before restarting your browser.

[SEO Quake](#)

[Dom Inspector](#)

[InspectThis](#)

[LinkChecker](#)

[NoDoFollow](#)

[Alexa Sparky](#)

[SearchStatus](#)

[Web Developer](#)

[ShowIP](#)

[IE Tab](#)

After you have installed all of the AddOns above you should restart Firefox.

Once you restart Firefox, you will notice several new items that are now present which are located at the bottom of the browser window. We will go into the uses of each one in a later lesson. Click the "SQ" to the Right of "*Compete*". It should turn yellow in color.

For now, you need to have a basic understanding of the new add-ons you installed. You now have FireFox installed and set it as your default browser.

First, click on the following link to visit one of my web sites - ScottLamon.com

You will notice a new bar at the top of your screen that is the **SEO Quake toolbar**.

While you don't need to understand every detail at this point, you can begin to click each item listed starting with the Arrow to the right of the "SQ" symbol on the far left and working your way across the toolbar.

Don't worry if it doesn't all make sense at this point. You will soon learn why this handy tool can show you a wealth of information that you can use to build your new online lottery business.

Now click on this link to go to [Google](#). You are going to perform a search for the term *new "Lottery Software"*. One of the things you will notice is that each web site now has additional information listed below it. It will have a # listed, the PR (Page Rank), Google Cache date and many other useful items that you will be using in the near future.

Look for my site that should be listed at the top or very close to the top *www.newlotterysoftware.com* and click the link to visit that site. Click on a few of the links within NewLotterySoftware.com and begin to familiarize yourself with not only the site but the SEO Quake tool bar again.

Notice how much of the data has changed to reflect the different type of content on this web site versus the first site we viewed (ie. ScottLamon.com)

Now, for a little more detailed examination....

You should still have Firefox open in another window and be on the home page of [NewLotterySoftware.com](#) - Now, simply look for the Button on the top left hand section of the page titled "Lottery Software" and click it...

You will see that the page and all of it's content remains exactly the same. The only thing that probably changed, if anything, is the Web Address in your browser window may have been <http://www.NewLotterySoftware.com> and now reads <http://www.NewLotterySoftware.com/index.html>...

So what exactly does that mean? Simply that you are viewing the home or "index page" of this web site. Almost all homepages will consist of an index page... either [index.html](#), [index.htm](#), or [index.php](#), etc.

While on this page you'll need to move your mouse toward the center of the page (away from any graphics) and right-click your mouse to bring up several new options now available to you. The first option you want to select is the "*NoDoFollow*" option. Just scroll until you find it and left-click "NoDoFollow".

Now, you will see several highlighted places on the page that are "links" to other web pages. All of them should be the same color (blueish) because there are no "NoFollow" links on this page. If there were they would be highlighted in red instead of blue.

"NoFollow links" are simply links that a webmaster does not want the Search Engines like Google to follow and give weight to. You'll learn more about the significance of this later.

You'll also see links that you may not have been aware were links to begin with. Namely the "Play the Mega-Millions in 17 countries" on the left and the "Site Privacy Policy" on the bottom left of the page. You can turn the *NoDoFollow* option on and off as you need it. You should right-click and turn it off for now.

This next hands-on assignment is very important!

Make sure you take your time and follow these steps exactly as outlined.

Make sure you are still on the home page of NewLotterySoftware.com - Right click your mouse again and look for the option "SEO Quake" then select "Keyword Density..." from the list of options.

SEO Quake - Keyword Density

When you selected this option it should have opened another tab or window with a detailed list of this web page's content. At the top you will see the URL, Title, Meta Keywords and Meta description.

Below that you will see a large set of keywords broken down into 1 word, 2 word, 3 word phrases etc. By default you will see the number of times the keywords appear on the page along with the percentage of times each word or phrase appears in relation to the total number of words on the page.

While there are many different opinions on what these numbers should be in order to rank highly within the search engines, the biggest consensus is to keep it below about 4% or so if possible. Otherwise your site might get penalized as "Spam" type content... **and you never want that.**

At this point there are still a few options for you to check. At the beginning of each keyword list you will see a red text link that says "Load Google Keyword Data". Click on each of these links to see more detailed information like the Search Volume from last month etc. *You will be asked to enter a random word or set of letters... do it.* You can also hover your mouse over the question mark beside Search Volume and the other terms for a complete description.

After you click the "Load Google Keyword Data" for all the lists (ie. 1 word, 2 words, 3 & 4 words phrases you will begin to see something very interesting and **VERY important.**

First, as you see the 1 word phrases get A LOT MORE searches than 2 words phrases.... 3 word phrases *usually* get even less and of course 4 word phrases still less again. BUT, the longer word phrases are usually *more targeted* and hence generally much more desired.

Now, your numbers might be slightly different than mine but as of the time of this writing the term "Lottery" got approximately 24.9 Million searches last month. This could have been people searching for a lottery to play or it could have been a 3rd grader writing a report for school or any number of other reasons. It is too hard to say why someone would search for this term because it is still very generic and it's *not a targeted keyword or phrase.*

If you had a website that ranked #1 for the word "Lottery" you would get a ton of traffic and a very large hosting/bandwidth bill but would have a hard time converting such a generic term into dollars... in short it is a waste of time and money to focus on such a broad term.

Now, looking at the 2 word phrases, you will see that the term "Lottery Software" got much fewer searches last month (approx. 74,000 last month as I view it now). ***This is a much more targeted phrase!!***

While there still may be a few term paper writers out there just looking for something to write about, chances are much greater that people searching for this phrase are looking to find and perhaps purchase a lottery software program. This is where we start to see the profit potential in this particular niche. That is around 2500 searches per day!!

But if you look at the "Approx Avg Search Volume" for that same term you will see that 74,000 is a very low number compared to the normal volume (approx. 301,000 as I'm viewing it). This would indicate a fluctuation based on the time of year.

Another very interesting thing occurs when you look at the 3 word phrases.... The term "Win the Lottery" gets a fairly decent amount of searches as well. These are likely people who are searching for a way to win the lottery but not yet decided on whether they are looking for a software program, lotto system or maybe even a lottery pool they can join.

Stop Now and Get yourself a notebook and pen and write down some of the different phrases along with the number of searches you see. You will be posting this information soon as part of this whole process. Divide the number by 30 if you'd like to see the average amount of searches per day for each term.

Now, you can close the SEO Quake page if you'd like and return to the main home page of NewLotterySoftware.com. This time you are going to right-click and select "Highlight Keyword" and type in "Lottery Software". This will highlight every instance that keyword phrase appears on the page.

At the very bottom of the page you will see several links. Click the one titled "Lotto Blog". This should take you to the blog section of this web site with several articles for you to read. There is even one with a video from me on YouTube. You can view this if you like but please be aware that I was pretty sick at the time I made that video and looked **VERY ROUGH**. I mean, I know I'm ugly but I was **REALLY** ugly that day!! ;-)

The main thing you should do on this blog now is look for the article titled "Lottery Software". It talks about the biggest problems with most traditional lotto software programs. At the bottom of this article you want to look for the option to "Leave a comment"... this is where I'd like you to post the keyword terms you wrote down earlier along with the numbers you saw displayed.

These numbers change so I'd like to keep a running record and this will be a good hands-on experience for you on *blog commenting*... **VERY IMPORTANT STUFF**.

Please post a little information about yourself and where you are currently located. Also, take a moment and as part of your comment let me know what you would do if you were to win the lottery right now. What would you do if you won \$100 Million and would it be very different if you only won \$1 Million or just \$500,000. Be as detailed as possible. This is another important part as you will soon see.

When you are done with your comment simply hit submit and it will be submitted for moderation. I will be notified and approve each comment individually to deter spam comments from people who stumble upon the blog and try and use it to promote their own web site or product...

Feel free to read any of the other articles and post any comments you would like. Please make them unique and relevant to the topic. This is good hands-on experience that you will be utilizing over and over again in the future.

Once you have finished reading and commenting you'll want to return to the "Lottery Software" article again. You will right click on the page as you've learned to do before and select "NoDoFollow" again. As you will see there are many links from

this page. Look for the 2 links *within the article itself*. One is "Lottery Software Programs" and the other is "Lottery Pool".

Choose either link and click it to return to the main home page.

So how exactly are you supposed to profit from what you just did?

Well, you've accomplished a lot more than you think you have as you are about to learn.

First, you have learned to use new add-on tools to analyze any site you are viewing to get a better understanding of the way it was constructed and why.

Also, while you were learning about the a few of the different add-ons you've installed, you helped start a ball rolling on just one particular site...

The simple exercises you just performed will help build the traffic to our Team site.

My whole team benefits and profits from the traffic that comes from NewLotterySoftware.com and so can you.

Every day more people visit and download this same document and follow the steps just like you did... even though this site is still very new it has already had hundreds of page views. It is fast on it's way to thousands of views!!

I've already done the math... if only 10 people out of every 100 who view this join our team then we are all in for a *wild and VERY profitable ride!!*

The beauty of this system is that you can earn a substantial income from those that join our team *after* you do.

Important Update - *I will keep this updated often*. Right now there is still a **1 open spot left on my second level** and then I will move on to fill the 3rd level.

So, what exactly are the levels and how can they benefit you?

Every person that becomes a member of our XZotto Top Team only needs to refer 7 other members AT MOST to be completely vested in the company and receive an additional \$100 bonus on top of all their commissions and any lottery winnings.

Because I have already personally enrolled all the people I need to, I am literally giving away all new members to people on my team. *You can add yourself to the list as soon as you create your XZotto account.*

Up until this point you have not spent a dime and have only a small amount of time invested.

The next step is one of the only things that you will actually need to spend money on and as you will see, you can earn more than your initial investment very quickly in this program. You can pay for your lottery software and even play the lottery for free with your earnings.

I am going to show you how you can invest \$63 and get paid over and over again while playing the lottery.... *For Free!!*

That may sound too good to be true but I am living proof it works. I now use the online lottery software and play the lottery at no cost! You can too. It's much easier than you might think.

In fact, did you know that over half of the population is already playing the lotto? That means, in the United States alone there are approximately 300 million people. Meanwhile, in 2007 the total U.S. Lottery Sales was \$65 Billion. That equals \$217 for every man, woman and child!! That is **STAGGERING DEMAND!!**

With that many people playing - how many do you think have made any significant money from the lotto? The answer, not many!! *XZotto is designed to change that!*

I am going to show you exactly how quickly your lottery pool can grow at a geometric rate.

The following numbers are based on every member ONLY getting 5 referrals (but remember - I'm actually going to help you get at least 7)

You can have:

1st level - 5

2nd level - 25

3rd level - 125

4th level - 625

5th level - 3125

6th level - 15,625

7th level - 78,125

TOTAL - 97,655 members in your online lottery pool

With the number of people currently playing the lottery in the U.S. (roughly half the population) that is not hard to do. But when you wrap your head around the fact that this *opportunity is already legal in 16 other countries...* it's a piece of cake!!

Countries that can now legally play using our online Software:

U.S. - All states except Utah and Nevada

Austria	Belgium
Canada	China
France	Ireland
Japan	Luxembourg
Mexico	Netherlands
Portugal	Russian Federation
Spain	Switzerland
Taiwan	United Kingdom (UK)

If you know anyone in the other countries listed above you are sitting on an absolute gold-mine!! Because this program is still very new, most of these other countries are virtually un-tapped... How would you like to be the person that starts an enormous group in Japan or China?? You can my friend!! And I'll bend over backwards to help you...

Hopefully at this point you have a firm grasp of what I am offering. If not, you are welcome to call me with any additional questions you might have.

Basically, I have put NewLotterySoftware.com online to help the entire team. Everyone who joins receives their own *Company Website*. When I'm determining who's link to add next I look at just a few simple things...

First, did the person follow all the steps in this tutorial? ie. Did they make the comments on the blog? Are they already actively recruiting other members? In short, are they working at building this business or are they just looking for a hand-out and have me build their business for them?...

While I probably *could* build everyone's business for them for awhile, I do not think it is fair to give someone who is not working ALL 7 of their needed members and only 1 or 2 sign-ups to someone who recruited 5 by themselves...

Does that make sense?

Anyway, if you've determined this is not right for you then you are still more than welcome to follow along with my free basic online Mentoring program at ScottLamon.com

For those that do see the potential in this business and decide to join our team, the next lesson you receive will go into detail about building your own website and jump-starting your new online business.

[Click here to access the video and receive future step-by-step team tutorials](#)

Again, if you have any questions, please don't hesitate to email or call me.

Wishing you Much Success in whatever you decide to pursue,

Scott Lamon
